

**PUBLIC NOTICE-CUSTOMERS OF
CLAY COUNTY PWS# 2
FAILURE TO MEET MICROBIOLOGICAL MONITORING
REQUIREMENTS FOR DRINKING WATER**

Este informe contiene información muy importante sobre su agua potable. Tradúzcalo o hable con alguien que lo entienda bien.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During March 2024, we did not properly complete all monitoring or testing for total coliform bacteria, and therefore, cannot be sure of the quality of our drinking water during that time. This is a violation of Missouri Public Drinking Water Regulations.

Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did to correct the situation. Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or by distributing copies by hand or mail.

Provide explanation of cause of monitoring failure:

A scheduling conflict caused a delay in submital of March Bac-T samples. They were submitted on April 23rd and when error was discovered. Regular April samples were completed on April 23rd.

For more information, please contact water system staff indicated below:

Jeremy Zimmerman at 816-781-1454 or 8600 Kari Rd, Pleasant Valley, MO 64086
(name of water system contact) (phone number) (mailing address)

Additionally, you may contact the department's Kansas City Regional Office at 816-251-0700 or Public Drinking Water Branch at 573-526-6925.
